Summary

Backend Engineer with 3+ years of software engineering experience building scalable APIs, integrating REST and GraphQL services, and deploying production-ready applications. Proficient in Python and FastAPI for backend service development, with hands-on experience working with databases including MongoDB and MySQL. Familiar with CI/CD pipelines and cloud deployment workflows on Azure. Collaborative engineer with a strong product-engineering mindset, experienced in owning features end to end and working cross-functionally with frontend engineers. Currently pursuing an M.S. in IT & Management at the Illinois Institute of Technology. Eager to bring backend engineering expertise to Stripe's infrastructure team, contributing to scalable API development and service deployment using Docker, Kubernetes, PostgreSQL, and Redis on AWS.

Skills

Languages: Python, TypeScript, JavaScript, HTML5, CSS3

Backend: FastAPI, Node.js, GraphQL, MongoDB, MySQL

Tools_and_deploy: Docker, Kubernetes, AWS, Azure App Service, Azure Static Web Apps, Git, GitHub, Postman, MongoDB Atlas, Vercel, Render

Frameworks: React JS, Next JS, Angular, Vue JS, jQuery, SASS, Tailwind CSS

Agentic_and_1lm: OpenAI SDK, CrewAI, LangGraph, LangChain, AutoGen, MCP

ML_and_rag: Hugging Face Hub, Transformers, Vector Database, Generative AI, Retrieval Augmented Generation (RAG), Prompt Engineering

State_management: Redux, Vuex, RxJS, Context API

Automation_tools: n8n, Make, Zapier

Experience

Front-End Web Developer Intern — AIFS, Naperville, Illinois

Jun 2025 – Aug 2025

- Set up CI/CD pipelines on Azure App Service to automate deployment and streamline end-to-end delivery of production-ready services.
- Built scalable and performant web applications using Astro and Blazor, collaborating cross-functionally to ship optimized solutions.
- Collaborated with teams to deliver production-ready web solutions, contributing to the full feature lifecycle from development to deployment.
- Implemented best practices for performance, discoverability, and scalable UI architecture across multiple projects.

Front-End Web Developer — GOWEBEZ, Chennai, India

Mar 2021 – Dec 2023

- Integrated REST APIs with MongoDB and MySQL backends to support real-time data operations across SaaS platforms in healthcare and education domains.
- Built and maintained Vue.js and React.js components with Vuex and Redux, consuming scalable backend APIs for dynamic data-driven features.
- Modernized a legacy jQuery application into a React.js architecture with Redux state management and Tailwind CSS, improving scalability and maintainability.
- Owned features end to end across two SaaS platforms, collaborating closely with backend engineers to ensure API contracts and data integrity.

Projects

Multi-Agent Research Assistant: Built a multi-agent research assistant with role-based agents and LangGraph orchestration, exposing structured tool-calling APIs; used Hugging Face models for embeddings and summarization and MCP for standardized tool connections — demonstrating backend API design and scalable service architecture.

Tech: CrewAI, LangGraph, MCP, Hugging Face, Python, FastAPI

Agentic Personalized Chatbot with Evaluator Agent: Developed a Python-based chatbot service using GPT-4o-mini with a Gemini 2.5 evaluator agent; implemented tool-calling to enable dynamic queries via external APIs and knowledge sources, demonstrating scalable API integration and backend service design.

Tech: OpenAI, Gemini, Tool-Calling, Python, FastAPI

Automation Copilot for SaaS Operations: Built an automation copilot that inspects and proposes workflows across platforms, using MCP to standardize tool connections and simulate workflows before deployment — showcasing backend orchestration and API-driven workflow automation.

Tech: n8n, MCP, Python

Education

MAS, Information Technology & Management (Web Development) — Illinois Institute of Technology
